

# DMwriter™

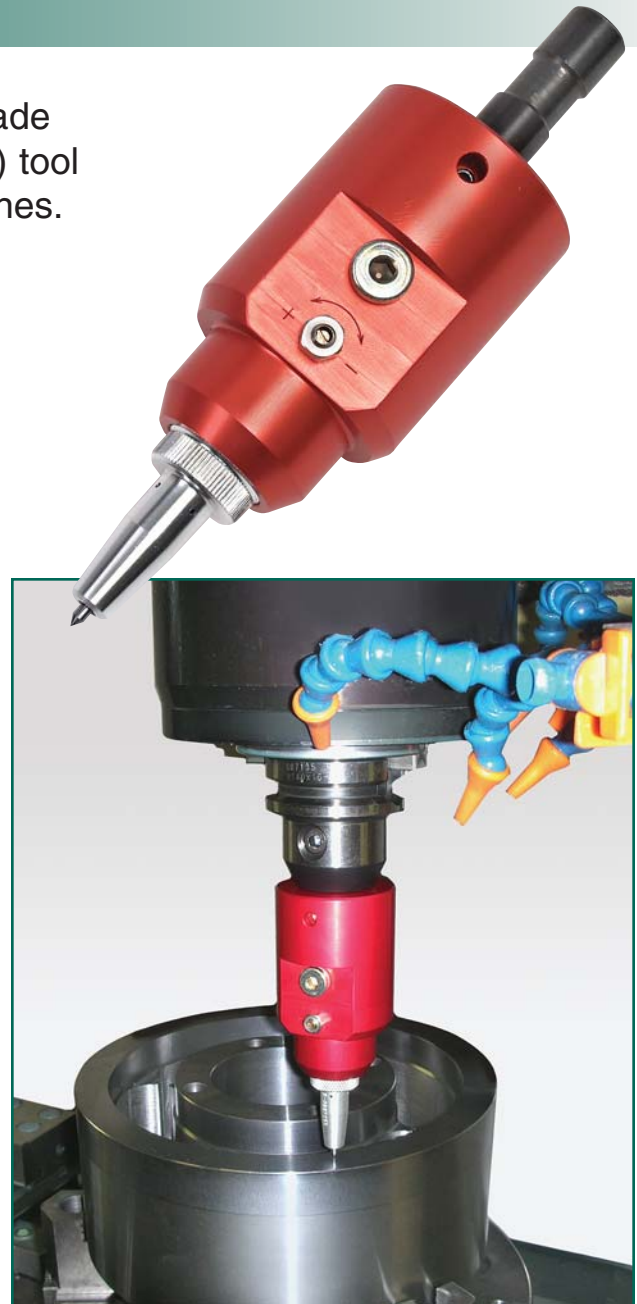

# DAPRA®

The DMwriter™ is a high-quality, Swiss-made precision micropercussion (indent marking) tool for marking parts in CNC-controlled machines.

Reduce your production cost for DPM (Direct Part Marking) in most materials up to 62 Rc.

- Easily integrated into your machining production cycle
- Fast operation – up to 120 IPM (inches per minute)
- Recommended air pressure 60-85 PSI, based on marking depth required
- Fits standard toolholders; 5/8" diameter shank is standard
- Automatic or manual control
- High-quality, permanent marks
- Produces no stress on the part – unlike engraving, no material is removed
- Uses standard engraving software to create text

**Contact Dapra today to learn how DMwriter™ can streamline your marking process and save you time and money!**
